## ABOUT ME

Whenever I'm pushing myself to learn something new, I think about my parents. Both were born profoundly deaf with little education. You get to see first hand what it's like to miss out on opportunities we usually take for granted.

I have a chance to do something really good with my life. Through education and hard work, I have come up with a formula that enables me to reach new heights in a short amount of time. I'm one of the lucky ones, I managed to figure it out and now I do what I love and work along side people who have a passion to succeed.

If we do what we love, it's only natural that positive energy will affect others. I want my life to be filled with good people and good times. I know I'm on the right path to making that happen!
